

- 1** What value of x makes the following equation true?

$$\sqrt{x} = 16$$

- a 4
- b 8
- c 32
- d 256

- 2** A cake is made of two cylindrical layers of ice cream stacked on top of each other as pictured below.

The formula for the volume of **one** layer of this cake, V , is

$$V = \pi r^2 h,$$

where r is the radius of the layer and h is the height of the layer.

Which of the following is closest to the total volume of ice cream needed to make the **two** layers of this cake?

- a 434 cm^3
- b 867 cm^3
- c 5448 cm^3
- d $17\,114 \text{ cm}^3$

- 3** The ramp pictured below is 12 m long and has a base of 10 m.

Which of the following is closest to the height, h , of the ramp?

- a 2 m
- b 7 m
- c 16 m
- d 22 m

- 4** The ratio of boys to girls in Mandy's mathematics class is 3 to 12.

This ratio is the same in Mandy's science class, in which there are 20 girls. How many boys are there in Mandy's science class?

- 5** Each week, a salesperson is paid a base salary of \$250 plus \$100 for each car sold.

Which of the following shows information that is all correct about the salesperson's total pay for a week?

a

Number of cars sold	Total pay (\$)
1	250
4	650
5	750

c

Number of cars sold	Total pay (\$)
1	350
4	1400
5	1750

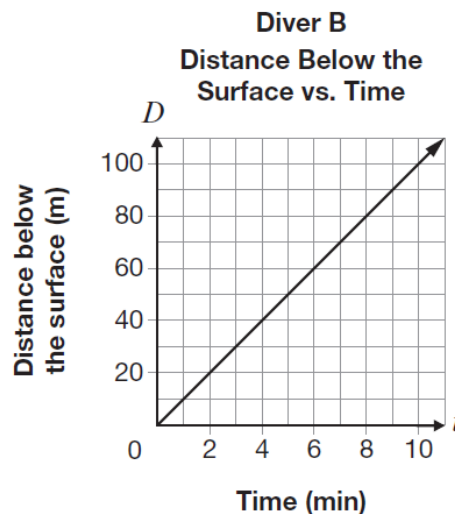

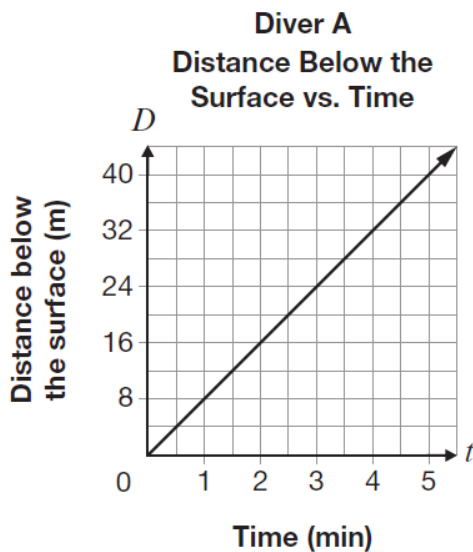

b

Number of cars sold	Total pay (\$)
1	250
4	1000
5	1250

d

Number of cars sold	Total pay (\$)
1	350
4	650
5	750

- 6** The relationship between the distance below the surface and time for two scuba divers is shown by the graphs below.

How much faster is diver B diving than diver A?

7 The Snack Company sells popcorn in 2 different-sized boxes. Each box is in the shape of a rectangular prism.

- Box A has dimensions 10 cm by 20 cm by 24 cm.
- Box B has dimensions 12 cm by 22 cm by 20 cm.

The price of the popcorn per cm^3 is the same for both boxes, and the price of each box is determined by the total volume of popcorn it can hold.

If Box A's price is \$6.24, what is the price of Box B?

8 A formula for the relationship between a person's maximum heart rate, H , and the person's age, a , is shown below.

$$H = 217 - 0.85a$$

According to the formula, which of the following is closest to Jasmin's maximum heart rate if she is 14 years old?

- a 203
- b 205
- c 229
- d 239

9 Halyna starts with \$50 in her bank account, and she spends \$3 per day from it.

Compared to Halyna, Manny starts with \$5 more in his account and spends \$1 more each day.

Which of the following equations represents the amount of money remaining in Manny's account, A , at the end of each day, d ?

- a $A = 51d$
- b $A = 59d$
- c $A = 55 - 9d$
- d $A = 55 - 4d$

10 The cost, C , in dollars, of a pizza with n toppings is represented by the equation $C = 2n + 5$.

Which of the following statements is true?

- a The base cost of the pizza is \$2, and the cost per topping is \$5.
- b The base cost of the pizza is \$5, and the cost per topping is \$2.
- c The base cost of the pizza is \$7, and the cost per topping is \$2.
- d The base cost of the pizza is \$7, and the cost per topping is \$5.

- 11** Last year's relationship between the total cost of producing yearbooks, C , and the number of yearbooks produced, n , is represented by the equation below.

$$C = 150 + 5n$$

This year, the initial cost is increased but the cost per yearbook is decreased.

Which graph could represent this year's relationship between total cost and the number of yearbooks?
